"CDAC AI Bhashantar" a generic Neural Machine Translation (NMT) system enables automated translations of the sentences from one language to another. This system is designed using Deep Learning techniques and has been trained on data from generic domain. Based on the one's domain and subject, we can also train the machine to fit your exact needs.

Our automated machine translation service offers great flexibility to the user. Now you can translate the sentence, paragraphs, and passages in least possible time with AI Bhashantar.

The system will give best possible approximate translation as it has understood from the intrinsic nature of data it has been trained on. It is always desirable to have a "man in the loop" approach when using Machine Translation to ensure that the translations are not totally off the mark.

Advantages:

✦ AI powered translation engine enriched with rich content and glossary.

✦ Economical - AI+human validation and correction enables us to deliver the effective solution.

✦ Fast turnaround - Reduce the time and effort of manual translation from scratch. Translation of the documents will be available in a few seconds.

✦ Quality output - AI engine (s) gives best suitable translation solutions.

✦ Multilingual support - Translation system into multiple Indian Languages. We can efficiently translate any content from English to regional languages and vice - versa like Hindi, Marathi, Punjabi, Bengali, Gujarati, and other languages.
